## WILEARN 4 LIFE: INCREASING KNOWLEDGE DRIVING CHANGE.

The spirit of our vision of changing one life at a time is alive not just in our staff alone but also in children who are determined to secure a brighter future through education. Our partner organization in digital learning- **WILEARN 4 LIFE** since **2021** has ensured that SBCC children are not marginalized in the fast-changing technological world.

SBCC children who are in various secondary schools are using every resource available at their disposal to increase their knowledge and drive change in their lives.

A group of these children have converted one of the rooms in St. Benedict into a digital resource Centre for their studies during school holidays.

**WILEARN 4 LIFE SERVER** has secondary education contents both for topical notes in all subjects and revision questions. They carry out private study and group discussion.

We therefore appreciate **Wilearn 4 Life** and all the supporters of offline Digital literacy because children at these age apart from the challenges of inadequate learning resources are also having danger of bad peer pressure. When they come for their creative studies we as well get opportunity to guide them so that they can be agents of change in the community.

**We look forward to having an expanded digital resource centre for children in Dandora for all levels of education.**
